

Third Grade Summer Math Work Summer 2024

Dear Parents/Guardians,

Over the summer, Cathedral teachers want to make sure students are practicing concepts and skills they learned last year so they are ready for the 2024-2025 school year. To keep students' math skills sharp, incoming third graders have a selection of IXL skills where they should spend 20 mins or achieve 100% to review concepts learned in second grade and introduce students to multiplication and division. Multiplication and division fluency is of the utmost importance coming into third grade, so we highly suggest introducing students to these skills over the summer so they are able to thrive in the third grade. The hope is that summer work is enriching but not overwhelming for students.

We ask that each student completes the IXL skills assigned, recording evidence of practice on the IXL practice log as they work. Six skills are from second grade to review and eight skills are third grade skills assigned to prepare for concepts we will be exploring together in third grade. There are a few optional fourth grade skills listed for students looking for a summer challenge. Students must reach 100% on each skill! Can you do more than the listed skills? Of course! We have even given you blank spaces at the end of the chart to list any other skills that you completed that were not included on this sheet.

Encourage your child to pace themselves. *Please don't wait until August to complete these skills!* If students do a couple skills a week, they will be able to complete their work before the start of school. Using a calendar to map out skills is a good strategy for growing in time management and long-term planning. Also, it is a great way to stay organized!

Each student is required to complete their IXL Math Log to his/her math teacher no later than Saturday, August 31st. Summer work will be entered in the gradebook as a twenty point completion grade for the first trimester marking period.

I wish you a very blessed, fun and safe summer.
Know of my prayers for you and your families!

God Bless,
Ms. Sanchez
