

Grades 1 and 2 Summer Math Work 2026-2027

Dear Parents/Guardians,

Over the summer, we want to make sure students are practicing the skills they learned last year so they are ready for the 2026-2027 school year when they return to school in August!

Next year will be an exciting and challenging year. To keep the children's Math skills sharp, attached you will find a **packet of benchmark skills in a white folder**. This packet should be completed over the summer and turned in when school commences in August.

Encourage your child to pace him or herself. **Don't wait until August to have them complete these skills!** If children do one benchmark assessment each week, they should be able to complete the packet before the start of school. If you are going on vacation over the summer, your child may want to take this packet along. Using a calendar to map out the assessments and when to complete them is a strong strategy and a great way to stay organized!

If your child completes the packet and there are skills you think they need further support with, you may want to have your child work on the corresponding section in IXL. IXL is a great resource for extra practice and reinforcement of concepts.

Each student is asked to complete and return the packet to his/her Math teacher in the fall when we return to school. This will be the first Math grade entered for the trimester.

Sincerely,

Grade 1:
Caitlin Bromley
